Allowable Subject Matter

Claims 3-7, 15-19, and 24-30 are allowed.

The closest reference "Survey of Computer-Aided Electrical Analysis of Integrated Circuit Interconnections" by Ruehli does not disclose or suggest the improvement of the instant application comprising the step of computing for the first electrical network an electrical resistance between the first port and port of the second ports, wherein the electrical resistance is a nearest-neighbor adjusted electrical resistance including displaying a perspective plot of the electrical resistances as a bar oriented about normal to each first port on the first side of the substrate having a height that is monotonically increasing function and each bar having a color or shade of gray that is reflective of a range of electrical resistances associative with a numerical measure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
